

Restful-Booker API Test Suite - README

Overview

This comprehensive test suite provides complete testing documentation for the **Restful-Booker API**. The suite includes 65 test cases covering all API endpoints with happy path scenarios, error scenarios, and edge cases. All test cases follow the JIRA format with clear steps to reproduce, expected results, and actual result fields.

Document Structure

1. **TEST_PLAN.md** (Main Test Planning Document)

- **When to Use**: Review this document first for overall project understanding and testing strategy

2. **Restful_Booker_API_Test_Cases.md** (Test Cases Reference)

- **Format**: Each test case includes:
- **When to Use**: Use this as your primary reference during test execution

3. **JIRA_FORMAT_AND_EXECUTION_GUIDE.md** (Execution Instructions)

- **When to Use**: Reference this document during test execution for JIRA formatting and step-by-step guidance

4. **QUICK_REFERENCE_GUIDE.md** (Fast Lookup)

- **When to Use**: Use this during active testing for quick command reference and troubleshooting

Test Coverage Summary

TOTAL TEST CASES: 65

Coverage by Endpoint:

Coverage by Scenario Type:

Quick Start Guide

Step 1: Understanding the API

Step 2: Prepare for Testing

Step 3: Execute Tests

Step 4: Document Results

Step 5: Generate Report

Test Metrics to Track

Coverage Metrics

Defect Metrics

Efficiency Metrics

Test Case Details by Endpoint

PING Endpoint (2 tests)

AUTH Endpoint (7 tests)

GET Booking IDs (9 tests)

GET Booking (8 tests)

CREATE Booking (15 tests)

UPDATE Booking (8 tests)

PATCH Booking (6 tests)

DELETE Booking (10 tests)

Required Tools & Setup

Testing Tools (Choose One)

Required Credentials

Software Requirements

Environment Setup

Execution Best Practices

1. **Sequential Execution**: Execute tests in order (especially dependent ones)

Common Test Scenarios Covered

Happy Path Testing

Error Scenario Testing

Edge Case Testing

How to Use Each Document

For Test Planning

For Test Execution

For JIRA Formatting

For Quick Reference

Pre-Execution Checklist

Before starting test execution:

Expected Test Results

After executing all 65 test cases, you should document:

Test Execution Summary

Support & Questions

For Test Case Questions

For Execution Issues

For JIRA Integration
